links	SS Rapide	4	
Trim differential			
a5-a1	N/A		
a5-ust1	N/A		
brk - toggle	N/A		

NOTES FROM OWNER

The Sharpchuter was built in 2003. I looked through my logbooks TWICE and I can only find three jumps on this canopy; and I am a pretty meticulous logger. Modifications include split stabilizers, split slider, flag bag, CRW lines, and retractable pilot chute. I'd bought it because I was planning on getting started with a small demo team, then moved between when the canopy was ordered and delivered.
